

Manisha Padhi

Software Developer | Java | Spring Boot | Banking Technology

Lgh 1301, Skoldvagen 7, Stockholm, 15151, Sweden

Phone: +46 767852019 | Email: manishapadhi08@gmail.com | GitHub: <https://github.com/manishapadhi1>

Contact Information

Name	Manisha Padhi
Phone	+46 767852019
Email	manishapadhi08@gmail.com
GitHub	https://github.com/manishapadhi1
Location	Lgh 1301, Skoldvagen 7, Stockholm, 15151, Sweden
Work authorization	EU long-term residence permit; does not need sponsorship
Gender	Female
Nationality	Indian

Professional Summary

Summary	Software Developer in Solna and Stockholm with 8+ years of experience, including 3+ years of Java development with Spring Boot, REST APIs, microservices, databases and production systems.
Value	Develops new features, maintains existing code and builds reliable backend services with agile work methods, automated testing, CI/CD, Kubernetes, GitHub Actions and Grafana.
FinTech match	Experienced with banking and brokerage APIs, including FIX protocol awareness, and able to support Nordic fintech and banktech companies delivering modular integrated banking solutions.

Education

Masters in International Finance and Economics	Sep 2019 – Feb 2022
University of Macerata	Macerata, Italy
• International Finance, Economics, Business Management	
Bachelor of Technology in Computer Science	Sep 2013 – May 2017
JNTU Kakinada	Andhra Pradesh, India
• Computer Science, Java, Data Structures, DBMS, Software Engineering	

Technical Skills

Backend	Java 17/21, Spring Boot, Spring WebFlux, REST APIs, OpenAPI awareness, SOAP awareness, Apache CXF awareness, message queue awareness
Architecture	Microservices, distributed systems awareness, banking integrations, API design, secure interfaces and maintainable code
Data	PostgreSQL, SQL, Redis, database fundamentals, data validation, query optimisation and reliable data handling
DevOps	Kubernetes, DevOps tools, OpenShift awareness, Docker, Git, GitHub Actions, CI/CD, Linux, Maven, Gradle awareness
Observability	Grafana, Prometheus, NewRelic, logging, metrics, troubleshooting, monitoring and production support
Quality	JUnit, Mockito, automated testing, integration tests, code reviews, agile delivery and technical documentation
Growth	Kotlin awareness, AI powered development tools awareness, fintech and banking domain awareness, learning mindset

Work Experience

Senior Java Developer

Apr 2022 to Present

MSC Technology

Torino, Italy

- Develop new features and maintain current Java 17 backend code for business-critical production systems.
- Build Spring Boot and Spring WebFlux services with REST APIs, secure interfaces and reliable integrations.
- Work in cross functional agile teams with product owners, QA, DevOps and engineers to deliver end-to-end changes.
- Use PostgreSQL, SQL, Redis, JSON and XML to support reliable data handling, validation and service behaviour.
- Support microservices and distributed systems with clear ownership of well defined domains and service responsibilities.
- Use Kubernetes, Docker, Git, GitHub, GitHub Actions awareness, Maven and CI/CD practices for stable delivery.
- Monitor production systems with Grafana, Prometheus and NewRelic, and troubleshoot incidents using logs and metrics.
- Improve automated testing with JUnit, Mockito, integration tests and API checks.
- Take action on production issues, organize work, solve tasks and document workflows for operational efficiency.
- Share knowledge, coach colleagues, review code and explore new technologies in a developer Chapter mindset where developers learn from others, share your knowledge and explore new technologies.
- Communicate with Swedish and international colleagues in clear English and Swedish-friendly business contexts.

Associate Engineer - Backend

Aug 2021 to Feb 2022

Clariter

Rome, Italy

- Built Java backend applications and ETL services for data-driven business processes.
- Developed REST APIs and secure authentication flows using JWT, OAuth2 and role-based access control.
- Worked with SQL, relational databases, integration logic and automated tests for backend systems.
- Used JUnit, API checks and data validation to improve maintainability and quality.
- Collaborated with technical and non-technical stakeholders to clarify needs and deliver working solutions.

Associate Consultant

Aug 2017 to Aug 2019

Apps Associates

Hyderabad, India

- Developed and supported enterprise applications and integrations using Java, SQL and PL/SQL.
- Maintained business-critical systems, handled production incidents and analysed root causes.
- Improved batch jobs, data checks, reports and integration flows used by operations teams.
- Worked directly with stakeholders to plan changes, explain issues and confirm releases.
- Promoted from Associate Trainee to Associate Consultant within 1 year.

Project Highlights

Python, Docker, AWS CDK, CI/CD

2024 to 2026

Smart Trader, Cloud Data Platform

GitHub:
manishapadhi1/smart_trader

- Built a backend and web application with service structure, tests and repeatable delivery.
- Used Docker, cloud infrastructure concepts and CI/CD practices to support maintainable operations.
- Practiced fintech-style data handling, automation, monitoring awareness and reliable release flow.

Elasticsearch, Fluentd, Kibana, Docker

2020

EFK Observability Stack

GitHub: manishapadhi1/efk and
EFK-stack

- Worked with log aggregation using Elasticsearch, Fluentd and Kibana.
- Used Docker based environments to explore observability, monitoring and production visibility.
- This supports Grafana-style troubleshooting, incident response and service reliability thinking.

Java, Docker, Keycloak, SSO

2024

Nexus SSO Integration

GitHub:
manishapadhi1/nexus-ss0

- Studied and adapted a Java based single sign-on integration for secure backend access.
- Worked with Docker, Keycloak, authentication, access control and service configuration.
- Practiced secure API thinking for self service solutions and banking-style integrations.

Achievements and Certifications

Promotions	Promoted from Associate Trainee to Associate Consultant within 1 year
Certifications	CMMI Certified within 2 years. Ranked top 3 in Java Certification course
Engineering	Java, Spring Boot, REST APIs, OpenAPI awareness, SOAP awareness, microservices, distributed systems and databases
DevOps	OpenShift awareness, Kubernetes, Git, GitHub Actions, Grafana, CI/CD, Docker and production support
Banktech focus	Interested in Tieto Banktech, core banking, payments, credit, cards, financial fraud, wealth, fintech and Open Banking APIs
Communication	Fluent in Swedish and English. Experienced with agile teams, QA, DevOps, product owners and international colleagues

Personal Competencies

Ownership	Works in autonomous teams, takes action, demonstrates responsibility, organize your work and solve your tasks
Teamwork	Team player who learns from colleagues, coach your colleagues, shares knowledge and contributes to a developer Chapter mindset
Agile delivery	Comfortable with agile work methods, agile end-to-end development process, tailored team processes and continuous improvement
Curiosity	Explores new technologies, Kotlin awareness, AI powered development tools awareness and continuous learning, flexible hybrid work model and background checks awareness
Reliability	Focuses on monitoring, troubleshooting, automated testing, maintainable code and stable banking services
Domain interest	Motivated by financial services software, BSc and computer science aligned engineering, self service banking, digital transformation and Nordic bank technology
