

Manisha Padhi

Applied AI Solutions Engineer | Backend Automation | Agentic Workflows

Lgh 1301, Skoldvagen 7, Stockholm, 15151, Sweden

Phone: +46 767852019 | Email: manishapadhi08@gmail.com | GitHub: <https://github.com/manishapadhi1>

Target Role

Company and role Scania - Applied AI Solutions Engineer - TRATON R&D AI Enablement
Location Sodertalje / Stockholm region, Sweden
Work authorization EU long-term residence permit; does not need sponsorship

Professional Summary

Summary Software Developer with 8+ years of experience building backend services, APIs, automation and production systems, with strong interest in AI-powered developer workflows and practical enterprise adoption.

Summary Well matched to TRATON R&D AI Enablement through hands-on engineering, ability to translate unclear needs into working prototypes, and experience collaborating with users, product owners, QA, DevOps and engineers.

Summary Brings a pragmatic build-first mindset for agentic workflows: decomposing problems, connecting tools and APIs, iterating with users and measuring impact on speed, quality and collaboration.

Target Role Fit

- Can analyze business or engineering friction and split work into deterministic logic, human review and AI-assisted workflow steps.
- Experienced building backend services, REST APIs, automation, testable integrations and CI/CD flows that can become reusable AI-enabled capabilities.
- Comfortable working hands-on with stakeholders to clarify ambiguous needs, prototype solutions and improve adoption based on feedback.
- Practical exposure to AI-powered development tools, cloud concepts, Docker, GitHub Actions and developer enablement workflows.
- Strong fit for hub-and-spoke AI Enablement because of communication, knowledge sharing, documentation and collaborative engineering habits.

Technical Skills

AI enablement LLM interest, AI-powered development tools, agentic workflow awareness, human-in-the-loop workflows, guardrails, prototype-to-adoption mindset

Software engineering Java 17/21, Spring Boot, REST APIs, backend logic, automation, integrations, secure interfaces, modular services

Developer tooling Git, GitHub Actions, CI/CD, Docker, Maven, test automation, documentation, repeatable delivery

Cloud and data AWS CDK project exposure, PostgreSQL, SQL, Redis, JSON, XML, data validation, monitoring

Collaboration Technical discovery, stakeholder dialogue, mob/team collaboration mindset, fast feedback, knowledge sharing

Work Experience

Senior Java Developer

Apr 2022 to Present

MSC Technology

Torino, Italy

- Build Java backend services and REST APIs that translate business needs into reliable, maintainable production functionality.
- Break down unclear requirements with product owners, QA, DevOps and engineers, then iterate toward working solutions with measurable delivery value.
- Use automated testing, integration checks, CI/CD and monitoring to improve speed, quality and confidence in software changes.
- Create documentation and share knowledge so teams can adopt repeatable workflows and operate services effectively.
- Explore AI-powered development tools and automation opportunities to improve engineering productivity and developer experience.
- Work with PostgreSQL, Redis, JSON, XML, Docker, Kubernetes, GitHub Actions, Grafana and logs to support practical integration and operational use cases.

Associate Engineer - Backend

Aug 2021 to Feb 2022

Clariter

Rome, Italy

- Built Java backend applications and ETL services for data-driven business processes.
- Developed REST APIs and secure authentication flows using JWT, OAuth2 and role-based access control.
- Worked with SQL, relational databases, integration logic, automated tests and stakeholder clarification.

Associate Consultant

Aug 2017 to Aug 2019

Apps Associates

Hyderabad, India

- Developed and supported enterprise applications and integrations using Java, SQL and PL/SQL.
- Maintained business-critical systems, handled production incidents, analyzed root causes and communicated fixes.
- Improved batch jobs, data checks, reports and integration flows used by operations teams; promoted within 1 year.

Project Highlights

Python, Docker, AWS CDK, CI/CD

2024 to 2026

Smart Trader, Cloud Data Platform

GitHub: manishapadhi1

- Built a backend and web application with service structure, tests and repeatable delivery.
- Used Docker, cloud infrastructure concepts and CI/CD practices to support maintainable operations.
- Practiced fintech-style data handling, automation, monitoring awareness and reliable release flow.

Elasticsearch, Fluentd, Kibana, Docker

2020

EFK Observability Stack

GitHub: manishapadhi1

- Worked with log aggregation using Elasticsearch, Fluentd and Kibana.
- Used Docker based environments to explore observability, monitoring and production visibility.

Java, Docker, Keycloak, SSO

2024

Nexus SSO Integration

GitHub: manishapadhi1

- Studied and adapted a Java based single sign-on integration for secure backend access.
- Worked with Docker, Keycloak, authentication, access control and service configuration.

Education

Masters in International Finance and Economics

Sep 2019 – Feb 2022

University of Macerata

Macerata, Italy

- International Finance, Economics, Business Management

Bachelor of Technology in Computer Science

Sep 2013 – May 2017

JNTU Kakinada

Andhra Pradesh, India

- Computer Science, Java, Data Structures, DBMS, Software Engineering

Achievements and Certifications

Promotions	Promoted from Associate Trainee to Associate Consultant within 1 year
Certifications	CMMI Certified within 2 years. Ranked top 3 in Java Certification course
Languages	Fluent in English; Swedish-friendly business communication context
Work authorization	EU long-term residence permit; does not need sponsorship
