Technical base Java, REST APIs, SQL, PostgreSQL, integrations, production systems, CI/CD, Grafana, troubleshooting

Communication International teams, business and IT bridge, clear English, Swedish-friendly workplace communication

Work Experience

Senior Java Developer

Apr 2022 to Present

MSC Technology

Torino, Italy

- Work with product owners, QA, DevOps, engineers and stakeholders to clarify needs, coordinate delivery and follow up end-to-end changes.
- Document workflows, operational procedures and technical decisions to support knowledge sharing, onboarding and consistent delivery quality.
- Translate business needs into backend service behaviour, validation rules, API changes and testable acceptance criteria.
- Support production systems by analyzing incidents, communicating status, coordinating fixes and confirming release outcomes.
- Use agile delivery practices, CI/CD awareness, automated testing and monitoring to improve transparency and team reliability.
- Collaborate with technical and non-technical colleagues in international environments using clear English and Swedish-friendly business communication.

Associate Engineer - Backend

Aug 2021 to Feb 2022

Clariter

Rome, Italy

- Built Java backend applications and ETL services for data-driven business processes.
- Developed REST APIs and secure authentication flows using JWT, OAuth2 and role-based access control.
- Worked with SQL, relational databases, integration logic, automated tests and stakeholder clarification.

Associate Consultant

Aug 2017 to Aug 2019

Apps Associates

Hyderabad, India

- Developed and supported enterprise applications and integrations using Java, SQL and PL/SQL.
- Maintained business-critical systems, handled production incidents, analyzed root causes and communicated fixes.
- Improved batch jobs, data checks, reports and integration flows used by operations teams; promoted within 1 year.

Project Highlights

Python, Docker, AWS CDK, CI/CD

2024 to 2026

Smart Trader, Cloud Data Platform

GitHub: manishapadhi1

- Built a backend and web application with service structure, tests and repeatable delivery.
- Used Docker, cloud infrastructure concepts and CI/CD practices to support maintainable operations.
- Practiced fintech-style data handling, automation, monitoring awareness and reliable release flow.

Elasticsearch, Fluentd, Kibana, Docker

2020

EFK Observability Stack

GitHub: manishapadhi1

- Worked with log aggregation using Elasticsearch, Fluentd and Kibana.
- Used Docker based environments to explore observability, monitoring and production visibility.

Java, Docker, Keycloak, SSO

2024

Nexus SSO Integration

GitHub: manishapadhi1

- Studied and adapted a Java based single sign-on integration for secure backend access.
- Worked with Docker, Keycloak, authentication, access control and service configuration.
