

Manisha Padhi

Solution Architecture | Enterprise Integration | Finance IT Transformation

Lgh 1301, Skoldvagen 7, Stockholm, 15151, Sweden

Phone: +46 767852019 | Email: manishapadhi08@gmail.com | GitHub: <https://github.com/manishapadhi1>

Target Role

Company and role Scania - Lead Solution Architect - Finance IT
Location Sodertalje / Stockholm region, Sweden
Work authorization EU long-term residence permit; does not need sponsorship

Professional Summary

Summary Senior software developer with 8+ years of experience in enterprise applications, backend services, integrations, databases, production systems and stakeholder collaboration.
Summary Relevant to Lead Solution Architect work through strong hands-on architecture foundations: APIs, microservices, data handling, secure interfaces, cloud/container awareness, integration design and maintainable enterprise solutions.
Summary Can support Finance IT transformation by bridging business and IT, documenting target-state decisions, aligning stakeholders and designing scalable, secure, value-driven solutions.

Target Role Fit

- Practical experience designing and maintaining APIs, microservices, database-backed systems, integrations and production-quality enterprise applications.
- Background in finance and economics plus software engineering supports understanding of Finance IT, legal/compliance-adjacent processes and ERP transformation contexts.
- Can collaborate with architects, product owners, DevOps, engineers and business stakeholders to align solution design with business goals.
- Relevant exposure to data platforms, APIs, event-driven architecture awareness, cloud concepts, AI/LLM interest and reusable data products.
- Strong communication, documentation, code review and mentoring habits that support architectural leadership and team guidance.

Technical Skills

Architecture	Solution design, API design, microservices, integration patterns, secure interfaces, scalability, maintainability, governance awareness
Enterprise IT	Finance/economics background, ERP awareness, data platforms, legacy modernization, stakeholder alignment, capability mapping awareness
Technology	Java 17/21, Spring Boot, REST APIs, PostgreSQL, SQL, Redis, Docker, Kubernetes, CI/CD, cloud concepts
Data and integration	JSON, XML, data validation, query optimisation, event-driven architecture awareness, reusable data product interest
Leadership	Code reviews, mentoring, technical documentation, cross-functional collaboration, business and IT communication

Work Experience

Senior Java Developer

Apr 2022 to Present

MSC Technology

Torino, Italy

- Design, develop and maintain Java backend services, REST APIs and data integrations for business-critical production systems.
- Collaborate with product owners, QA, DevOps and engineers to align solution design with business needs, technical constraints and release goals.
- Use PostgreSQL, SQL, Redis, JSON and XML to support reliable data handling, validation, integration flows and service behaviour.
- Apply microservice, secure interface, CI/CD, Docker, Kubernetes and observability practices to improve scalability and maintainability.
- Review code, document workflows, mentor colleagues and share knowledge to support consistent engineering decisions and quality.
- Troubleshoot production issues using Grafana, Prometheus, NewRelic, logs and metrics, then feed learnings into technical improvements.

Associate Engineer - Backend

Aug 2021 to Feb 2022

Clariter

Rome, Italy

- Built Java backend applications and ETL services for data-driven business processes.
- Developed REST APIs and secure authentication flows using JWT, OAuth2 and role-based access control.
- Worked with SQL, relational databases, integration logic, automated tests and stakeholder clarification.

Associate Consultant

Aug 2017 to Aug 2019

Apps Associates

Hyderabad, India

- Developed and supported enterprise applications and integrations using Java, SQL and PL/SQL.
- Maintained business-critical systems, handled production incidents, analyzed root causes and communicated fixes.
- Improved batch jobs, data checks, reports and integration flows used by operations teams; promoted within 1 year.

Project Highlights

Python, Docker, AWS CDK, CI/CD

2024 to 2026

Smart Trader, Cloud Data Platform

GitHub: manishapadhi1

- Built a backend and web application with service structure, tests and repeatable delivery.
- Used Docker, cloud infrastructure concepts and CI/CD practices to support maintainable operations.
- Practiced fintech-style data handling, automation, monitoring awareness and reliable release flow.

Elasticsearch, Fluentd, Kibana, Docker

2020

EFK Observability Stack

GitHub: manishapadhi1

- Worked with log aggregation using Elasticsearch, Fluentd and Kibana.
- Used Docker based environments to explore observability, monitoring and production visibility.

Java, Docker, Keycloak, SSO

2024

Nexus SSO Integration

GitHub: manishapadhi1

- Studied and adapted a Java based single sign-on integration for secure backend access.
- Worked with Docker, Keycloak, authentication, access control and service configuration.

Education

Masters in International Finance and Economics

Sep 2019 – Feb 2022

University of Macerata

Macerata, Italy

- International Finance, Economics, Business Management

Bachelor of Technology in Computer Science

JNTU Kakinada

- Computer Science, Java, Data Structures, DBMS, Software Engineering

Sep 2013 – May 2017

Andhra Pradesh, India

Achievements and Certifications

Promotions Promoted from Associate Trainee to Associate Consultant within 1 year

Certifications CMMI Certified within 2 years. Ranked top 3 in Java Certification course

Languages Fluent in English; Swedish-friendly business communication context

Work authorization EU long-term residence permit; does not need sponsorship
