

Manisha Padhi

Senior Application Support Engineer | L2/L3 Production Support | Java & Spring Boot
Stockholm, Sweden | Female | EU long-term residence permit | No sponsorship required

Phone: +46 767852019 | Email: manishapadhi08@gmail.com | GitHub: <https://github.com/manishapadhi1>

Professional Summary

Senior software and application support professional with 8+ years of enterprise IT experience, including 3+ years focused on Java/Spring Boot backend systems, production support and operational reliability.

Experienced supporting business-critical applications through incident analysis, root-cause investigation, release readiness, monitoring, stakeholder communication and cross-functional coordination.

Strong fit for L2/L3 application support in telecom or high-availability environments, with practical experience in Java services, REST APIs, SQL databases, CI/CD, observability and production troubleshooting.

Selected Achievements and Highlights

- Supports critical production systems by analyzing incidents, coordinating fixes, validating releases and communicating status with technical and non-technical stakeholders.
- Applies Java, Spring Boot, REST API, SQL/PostgreSQL, Redis, Docker, Kubernetes, CI/CD and observability experience to diagnose and stabilize application behaviour.
- Uses Grafana, Prometheus, NewRelic, logs and metrics to investigate production issues, identify patterns and improve operational reliability.
- 8+ years of enterprise IT experience, including 3+ years focused on Java/Spring Boot backend development for production systems.
- Recognized career progression: promoted from Associate Trainee to Associate Consultant within 1 year.
- CMMI certified within 2 years and ranked top 3 in a Java certification course, supporting a quality-focused engineering profile.

Technical Skills

Application support	L2/L3 production support, incident analysis, root-cause investigation, release validation, operational handover, stakeholder communication
Java stack	Java 17/21, Spring Boot, Spring WebFlux, REST APIs, Maven, JUnit, Mockito, integration testing, clean code practices
Runtime and data	JBoss application server context, PostgreSQL, SQL, MySQL concepts, Redis, JSON, XML, data validation, query troubleshooting
ITSM operations	Incident Management, Problem Management, Change Management, ITIL process alignment, ServiceNow-style ticket workflows
Observability and automation	Grafana, Prometheus, NewRelic, logging, metrics, alerting, CI/CD, Docker, Kubernetes, GitHub Actions, Linux

Work Experience

Senior Java Developer	Apr 2022 to Present
MSC Technology	Torino, Italy

- Support business-critical Java 17 backend services and REST APIs in production, taking ownership of incidents from investigation through fix validation and release follow-up.
- Troubleshoot production behaviour using logs, metrics, Grafana, Prometheus and NewRelic, identifying root causes across application logic, integrations and data handling.
- Work with product owners, QA, DevOps and engineers to clarify incidents, prioritize fixes, coordinate releases and communicate operational status.
- Maintain Spring Boot and Spring WebFlux services backed by PostgreSQL, SQL, Redis, JSON and XML, with focus on reliable data handling and service behaviour.
- Improve supportability through automated tests, integration checks, API validation, documentation and repeatable handover workflows.
- Use Docker, Kubernetes, Git, GitHub Actions, Maven and CI/CD practices to support stable deployment, release readiness and operational continuity.

Associate Engineer - Backend

Aug 2021 to Feb 2022

Clariter

Rome, Italy

- Built Java backend applications and ETL services for data-driven business processes.
- Developed REST APIs and secure authentication flows using JWT, OAuth2 and role-based access control.
- Worked with SQL, relational databases, integration logic, automated tests and stakeholder clarification.

Associate Consultant

Aug 2017 to Aug 2019

Apps Associates

Hyderabad, India

- Developed and supported enterprise applications and integrations using Java, SQL and PL/SQL.
- Maintained business-critical systems, handled production incidents, analyzed root causes and communicated fixes.
- Improved batch jobs, data checks, reports and integration flows used by operations teams; promoted within 1 year.

Project Highlights

Python, Docker, AWS CDK, CI/CD

2024 to 2026

Smart Trader, Cloud Data Platform

GitHub: manishapadhi1

- Built a backend and web application with service structure, tests and repeatable delivery.
- Used Docker, cloud infrastructure concepts and CI/CD practices to support maintainable operations.
- Practiced fintech-style data handling, automation, monitoring and reliable release flow.

Elasticsearch, Fluentd, Kibana, Docker

2020

EFK Observability Stack

GitHub: manishapadhi1

- Worked with log aggregation using Elasticsearch, Fluentd and Kibana.
- Used Docker based environments to explore observability, monitoring and production visibility.

Java, Docker, Keycloak, SSO

2024

Nexus SSO Integration

GitHub: manishapadhi1

- Studied and adapted a Java based single sign-on integration for secure backend access.
- Worked with Docker, Keycloak, authentication, access control and service configuration.

Education

Masters in International Finance and Economics

Sep 2019 – Feb 2022

University of Macerata

Macerata, Italy

- International Finance, Economics, Business Management

Bachelor of Technology in Computer Science

Sep 2013 – May 2017

JNTU Kakinada

Andhra Pradesh, India

- Computer Science, Java, Data Structures, DBMS, Software Engineering

Achievements and Certifications

Promotions

Promoted from Associate Trainee to Associate Consultant within 1 year

Certifications

CMMI Certified within 2 years. Ranked top 3 in Java Certification course

Languages

Fluent in English; Swedish-friendly business communication context
