Professional Summary

Software Developer with 8+ years of experience building backend services, APIs, automation and production systems, with practical exposure to AI-powered developer workflows and enterprise automation patterns.

Experienced translating unclear user and engineering needs into working prototypes, backend integrations, and production-ready services in collaboration with users, product owners, QA, DevOps, and engineering teams.

Brings a pragmatic build-first mindset for agentic workflows, including agentic architectures, tool use, guardrails, agent security, model tiering and hybrid deployments across frontier and smaller models.

Selected Achievements and Highlights

- Analyzes business and engineering friction, separating deterministic logic, human review steps, agent/tool orchestration and AI-assisted workflow opportunities.
- Experienced building backend services, REST APIs, automation, testable integrations and CI/CD flows that can become reusable AI-enabled capabilities.
- Comfortable working hands-on with stakeholders to clarify ambiguous needs, prototype solutions and improve adoption based on feedback.
- 8+ years of enterprise IT experience, including 3+ years focused on Java/Spring Boot backend development for production systems.
- Recognized career progression: promoted from Associate Trainee to Associate Consultant within 1 year.
- CMMI certified within 2 years and ranked top 3 in a Java certification course, supporting a quality-focused engineering profile.

Technical Skills

AI platforms	LangChain, AutoCodeRover, Codex-style coding agents, ChatGPT Enterprise, Microsoft 365 Copilot, GitLab Duo, agentic workflows
Agentic architecture	tool orchestration, human-in-the-loop design, guardrails, agent security, model tiering, GAIA-style evaluation, hybrid AI deployments
Developer tooling	Git, GitHub Actions, CI/CD, Docker, Maven, test automation, documentation, repeatable delivery, developer enablement workflows
Model and data operations	AWS CDK project exposure, PostgreSQL, SQL, Redis, JSON, XML, Hugging Face model consumption, Artifactory model repositories
Collaboration	Technical discovery, stakeholder dialogue, mob/team collaboration mindset, fast feedback, knowledge sharing

Work Experience

Senior Java Developer

Apr 2022 to Present

MSC Technology

Torino, Italy

- Build Java backend services and REST APIs that translate business needs into reliable, maintainable production functionality.
- Break down unclear requirements with product owners, QA, DevOps and engineers, then iterate toward working solutions with measurable delivery value.
- Use automated testing, integration checks, CI/CD and monitoring to improve speed, quality and confidence in software changes.
- Create documentation and share knowledge so teams can adopt repeatable workflows and operate services effectively.
- Explore AI-powered development tools and automation opportunities to improve engineering productivity and developer experience.
- Work with PostgreSQL, Redis, JSON, XML, Docker, Kubernetes, GitHub Actions, Grafana and logs to support practical integration and operational use cases.

Associate Engineer - Backend

Aug 2021 to Feb 2022

Clariter

Rome, Italy

- Built Java backend applications and ETL services for data-driven business processes.
- Developed REST APIs and secure authentication flows using JWT, OAuth2 and role-based access control.
- Worked with SQL, relational databases, integration logic, automated tests and stakeholder clarification.

Associate Consultant

Aug 2017 to Aug 2019

Apps Associates

Hyderabad, India

- Developed and supported enterprise applications and integrations using Java, SQL and PL/SQL.
- Maintained business-critical systems, handled production incidents, analyzed root causes and communicated fixes.
- Improved batch jobs, data checks, reports and integration flows used by operations teams; promoted within 1 year.

Project Highlights

Python, Docker, AWS CDK, CI/CD

2024 to 2026

Smart Trader, Cloud Data Platform

GitHub: manishapadhi1

- Built a backend and web application with service structure, tests and repeatable delivery.
- Used Docker, cloud infrastructure concepts and CI/CD practices to support maintainable operations.
- Practiced fintech-style data handling, automation, monitoring and reliable release flow.

Elasticsearch, Fluentd, Kibana, Docker

2020

EFK Observability Stack

GitHub: manishapadhi1

- Worked with log aggregation using Elasticsearch, Fluentd and Kibana.
- Used Docker based environments to explore observability, monitoring and production visibility.

Java, Docker, Keycloak, SSO

2024

Nexus SSO Integration

GitHub: manishapadhi1

- Studied and adapted a Java based single sign-on integration for secure backend access.
- Worked with Docker, Keycloak, authentication, access control and service configuration.

Education

Masters in International Finance and Economics

Sep 2019 – Feb 2022

University of Macerata

Macerata, Italy

- International Finance, Economics, Business Management

Bachelor of Technology in Computer Science

Sep 2013 – May 2017

JNTU Kakinada

Andhra Pradesh, India

- Computer Science, Java, Data Structures, DBMS, Software Engineering

Achievements and Certifications

Promotions

Promoted from Associate Trainee to Associate Consultant within 1 year

Certifications

CMMI Certified within 2 years. Ranked top 3 in Java Certification course

Languages

Fluent in English; Swedish-friendly business communication context
