

Manisha Padhi

Software Developer | Solution Architecture | Enterprise Integration

Stockholm, Sweden | Female | EU long-term residence permit | No sponsorship required

Phone: +46 767852019 | Email: manishapadhi08@gmail.com | GitHub: <https://github.com/manishapadhi1>

Professional Summary

Senior software developer with 8+ years of experience in enterprise applications, backend services, integrations, databases, production systems and stakeholder collaboration.

Brings hands-on architecture foundations in APIs, microservices, data handling, secure interfaces, cloud and container concepts, integration design, and maintainable enterprise solutions.

Supports Finance IT transformation by bridging business and IT, documenting target-state decisions, aligning stakeholders and designing scalable, secure, value-driven solutions.

Selected Achievements and Highlights

- Designs and maintains APIs, microservices, database-backed systems, integrations and production-quality enterprise applications with architecture discipline.
- Background in finance and economics plus software engineering supports understanding of Finance IT, legal/compliance-adjacent processes and ERP transformation contexts.
- Collaborates with architects, product owners, DevOps, engineers, and business stakeholders to align solution design with business goals.
- 8+ years of enterprise IT experience, including 3+ years focused on Java/Spring Boot backend development for production systems.
- Recognized career progression: promoted from Associate Trainee to Associate Consultant within 1 year.
- CMMI certified within 2 years and ranked top 3 in a Java certification course, supporting a quality-focused engineering profile.

Technical Skills

Architecture	solution design, API design, microservices, integration patterns, event-driven architecture, secure interfaces, scalability, governance
Enterprise IT	finance/economics background, ERP concepts, data platforms, legacy modernization, capability mapping, stakeholder alignment
Technology	Java 17/21, Spring Boot, REST APIs, PostgreSQL, SQL, Redis, Docker, Kubernetes, CI/CD, cloud concepts
Data and integration	JSON, XML, data validation, query optimisation, reusable data products, API-led integration, data governance concepts
Leadership	Code reviews, mentoring, technical documentation, cross-functional collaboration, business and IT communication

Work Experience

Senior Java Developer Apr 2022 to Present

MSC Technology Torino, Italy

- Design, develop and maintain Java backend services, REST APIs and data integrations for business-critical production systems.
- Collaborate with product owners, QA, DevOps and engineers to align solution design with business needs, technical constraints and release goals.
- Use PostgreSQL, SQL, Redis, JSON and XML to support reliable data handling, validation, integration flows and service behaviour.
- Apply microservice, secure interface, CI/CD, Docker, Kubernetes and observability practices to improve scalability and maintainability.
- Review code, document workflows, mentor colleagues and share knowledge to support consistent engineering decisions and quality.
- Troubleshoot production issues using Grafana, Prometheus, NewRelic, logs and metrics, then feed learnings into technical improvements.

Associate Engineer - Backend

Aug 2021 to Feb 2022

Clariter

Rome, Italy

- Built Java backend applications and ETL services for data-driven business processes.
- Developed REST APIs and secure authentication flows using JWT, OAuth2 and role-based access control.
- Worked with SQL, relational databases, integration logic, automated tests and stakeholder clarification.

Associate Consultant

Aug 2017 to Aug 2019

Apps Associates

Hyderabad, India

- Developed and supported enterprise applications and integrations using Java, SQL and PL/SQL.
- Maintained business-critical systems, handled production incidents, analyzed root causes and communicated fixes.
- Improved batch jobs, data checks, reports and integration flows used by operations teams; promoted within 1 year.

Project Highlights

Python, Docker, AWS CDK, CI/CD

2024 to 2026

Smart Trader, Cloud Data Platform

GitHub: manishapadhi1

- Built a backend and web application with service structure, tests and repeatable delivery.
- Used Docker, cloud infrastructure concepts and CI/CD practices to support maintainable operations.
- Practiced fintech-style data handling, automation, monitoring and reliable release flow.

Elasticsearch, Fluentd, Kibana, Docker

2020

EFK Observability Stack

GitHub: manishapadhi1

- Worked with log aggregation using Elasticsearch, Fluentd and Kibana.
- Used Docker based environments to explore observability, monitoring and production visibility.

Java, Docker, Keycloak, SSO

2024

Nexus SSO Integration

GitHub: manishapadhi1

- Studied and adapted a Java based single sign-on integration for secure backend access.
- Worked with Docker, Keycloak, authentication, access control and service configuration.

Education

Masters in International Finance and Economics

Sep 2019 – Feb 2022

University of Macerata

Macerata, Italy

- International Finance, Economics, Business Management

Bachelor of Technology in Computer Science

Sep 2013 – May 2017

JNTU Kakinada

Andhra Pradesh, India

- Computer Science, Java, Data Structures, DBMS, Software Engineering

Achievements and Certifications

Promotions

Promoted from Associate Trainee to Associate Consultant within 1 year

Certifications

CMMI Certified within 2 years. Ranked top 3 in Java Certification course

Languages

Fluent in English; Swedish-friendly business communication context
