Professional Summary

Software Developer with 8+ years of IT experience and strong hands-on background in Java backend systems, agile delivery, production support and cross-functional collaboration.

Experienced in sprint-based delivery with product owners, QA, DevOps, and engineering teams, including code reviews, knowledge sharing, impediment handling, CI/CD, and production-quality software.

Brings practical technical credibility for teams working with backend services, microservices, diagnostics-adjacent platforms, connectivity, security mindset and continuous improvement.

Selected Achievements and Highlights

- Facilitates agile delivery conversations from a developer perspective, keeping team discussions focused on value, flow, quality, and release readiness.
- Experienced collaborating with product owners, QA, DevOps and engineers to align priorities, dependencies and release readiness in agile teams.
- Hands-on Java, Spring Boot, REST API, microservice, Kubernetes, CI/CD, Grafana and production support background gives credibility with technical teams.
- 8+ years of enterprise IT experience, including 3+ years focused on Java/Spring Boot backend development for production systems.
- Recognized career progression: promoted from Associate Trainee to Associate Consultant within 1 year.
- CMMI certified within 2 years and ranked top 3 in a Java certification course, supporting a quality-focused engineering profile.

Technical Skills

Agile delivery	Scrum ceremonies, sprint planning, reviews, retrospectives, daily stand-ups, SAFe-inspired PI context, backlog flow, impediment removal
Delivery	Cross-functional teams, product owner collaboration, QA, DevOps, release readiness, documentation, stakeholder communication
Technical context	Java 17, Spring Boot, REST APIs, microservices, PostgreSQL, Redis, Docker, Kubernetes, GitHub Actions, CI/CD
Observability	Grafana, Prometheus, NewRelic, logging, metrics, incident analysis, production troubleshooting
Diagnostics platform context	secure interfaces, backend services, API checks, integration testing, reliability, diagnostics/connectivity domain context

Work Experience

Senior Java Developer

Apr 2022 to Present

MSC Technology

Torino, Italy

- Develop and maintain Java 17 backend services for business-critical production systems using Spring Boot, REST APIs, microservices and databases.
- Work in cross-functional agile teams with product owners, QA, DevOps and engineers to deliver end-to-end changes with clear priorities and ownership.
- Support team flow by clarifying requirements, reviewing code, documenting workflows and helping colleagues resolve technical blockers.
- Improve delivery quality through JUnit, Mockito, integration tests, API checks, CI/CD practices and production monitoring.
- Use Kubernetes, Docker, Git, GitHub Actions, Maven, Grafana, Prometheus and NewRelic to support stable delivery and operational transparency.
- Coach colleagues, share knowledge and contribute to a developer chapter culture focused on learning, collaboration and continuous improvement.

Associate Engineer - Backend

Aug 2021 to Feb 2022

Clariter

Rome, Italy

- Built Java backend applications and ETL services for data-driven business processes.
- Developed REST APIs and secure authentication flows using JWT, OAuth2 and role-based access control.
- Worked with SQL, relational databases, integration logic, automated tests and stakeholder clarification.

Associate Consultant

Aug 2017 to Aug 2019

Apps Associates

Hyderabad, India

- Developed and supported enterprise applications and integrations using Java, SQL and PL/SQL.
- Maintained business-critical systems, handled production incidents, analyzed root causes and communicated fixes.
- Improved batch jobs, data checks, reports and integration flows used by operations teams; promoted within 1 year.

Project Highlights

Python, Docker, AWS CDK, CI/CD

2024 to 2026

Smart Trader, Cloud Data Platform

GitHub: manishapadhi1

- Built a backend and web application with service structure, tests and repeatable delivery.
- Used Docker, cloud infrastructure concepts and CI/CD practices to support maintainable operations.
- Practiced fintech-style data handling, automation, monitoring and reliable release flow.

Elasticsearch, Fluentd, Kibana, Docker

2020

EFK Observability Stack

GitHub: manishapadhi1

- Worked with log aggregation using Elasticsearch, Fluentd and Kibana.
- Used Docker based environments to explore observability, monitoring and production visibility.

Java, Docker, Keycloak, SSO

2024

Nexus SSO Integration

GitHub: manishapadhi1

- Studied and adapted a Java based single sign-on integration for secure backend access.
- Worked with Docker, Keycloak, authentication, access control and service configuration.

Education

Masters in International Finance and Economics

Sep 2019 – Feb 2022

University of Macerata

Macerata, Italy

- International Finance, Economics, Business Management

Bachelor of Technology in Computer Science

Sep 2013 – May 2017

JNTU Kakinada

Andhra Pradesh, India

- Computer Science, Java, Data Structures, DBMS, Software Engineering

Achievements and Certifications

Promotions

Promoted from Associate Trainee to Associate Consultant within 1 year

Certifications

CMMI Certified within 2 years. Ranked top 3 in Java Certification course

Languages

Fluent in English; Swedish-friendly business communication context
