Professional Summary

Software Developer with 8+ years of IT experience connecting business needs, system behaviour, requirements, implementation, testing and production quality.

Experienced in structured requirements handling, stakeholder communication, traceability mindset, integration testing, risk management, and complex distributed systems.

Brings strong software engineering discipline for charging-related vehicle functions: translating needs into clear requirements, aligning teams and ensuring testable, reliable delivery.

Selected Achievements and Highlights

- Translates customer and stakeholder needs into requirements, acceptance criteria, traceability links, test cases, risk follow-up and delivery readiness.
- Experienced managing dependencies across product owners, QA, DevOps, engineers and operational stakeholders in agile delivery.
- Strong testing and quality mindset through JUnit, Mockito, integration tests, API checks, production support and incident analysis.
- 8+ years of enterprise IT experience, including 3+ years focused on Java/Spring Boot backend development for production systems.
- Recognized career progression: promoted from Associate Trainee to Associate Consultant within 1 year.
- CMMI certified within 2 years and ranked top 3 in a Java certification course, supporting a quality-focused engineering profile.

Technical Skills

Function ownership	requirements engineering, function breakdown, traceability, dependency management, risk follow-up, test coverage, delivery readiness
System development	Java, Spring Boot, REST APIs, microservices, distributed systems, secure interfaces, integration testing
Quality	JUnit, Mockito, automated tests, API checks, validation, root-cause analysis, documentation
Vehicle domain	charging systems context, electrical power distribution concepts, ISO 26262/HARA concepts, ISO 21434/TARA concepts, UNECE R155/R156 regulatory context
Collaboration	Product owners, architects, test engineers, QA, DevOps, agile teams, international communication

Work Experience

Senior Java Developer

Apr 2022 to Present

MSC Technology

Torino, Italy

- Translate business and stakeholder needs into Java backend functionality, REST APIs, validation rules and testable service behaviour.
- Collaborate with product owners, QA, DevOps and engineers to clarify requirements, dependencies, risks and release readiness.
- Support traceability between requirements, implementation, integration tests, API checks and production monitoring evidence.
- Maintain reliable distributed services using PostgreSQL, SQL, Redis, JSON and XML with strong focus on data correctness and operational quality.
- Improve automated testing with JUnit, Mockito, integration tests and API checks to strengthen coverage and reduce delivery risk.
- Troubleshoot production issues using logs, metrics, Grafana, Prometheus and NewRelic, then document improvements and workflows.

Associate Engineer - Backend

Aug 2021 to Feb 2022

Clariter

Rome, Italy

- Built Java backend applications and ETL services for data-driven business processes.
- Developed REST APIs and secure authentication flows using JWT, OAuth2 and role-based access control.
- Worked with SQL, relational databases, integration logic, automated tests and stakeholder clarification.

Associate Consultant

Aug 2017 to Aug 2019

Apps Associates

Hyderabad, India

- Developed and supported enterprise applications and integrations using Java, SQL and PL/SQL.
- Maintained business-critical systems, handled production incidents, analyzed root causes and communicated fixes.
- Improved batch jobs, data checks, reports and integration flows used by operations teams; promoted within 1 year.

Project Highlights

Python, Docker, AWS CDK, CI/CD

2024 to 2026

Smart Trader, Cloud Data Platform

GitHub: manishapadhi1

- Built a backend and web application with service structure, tests and repeatable delivery.
- Used Docker, cloud infrastructure concepts and CI/CD practices to support maintainable operations.
- Practiced fintech-style data handling, automation, monitoring and reliable release flow.

Elasticsearch, Fluentd, Kibana, Docker

2020

EFK Observability Stack

GitHub: manishapadhi1

- Worked with log aggregation using Elasticsearch, Fluentd and Kibana.
- Used Docker based environments to explore observability, monitoring and production visibility.

Java, Docker, Keycloak, SSO

2024

Nexus SSO Integration

GitHub: manishapadhi1

- Studied and adapted a Java based single sign-on integration for secure backend access.
- Worked with Docker, Keycloak, authentication, access control and service configuration.

Education

Masters in International Finance and Economics

Sep 2019 – Feb 2022

University of Macerata

Macerata, Italy

- International Finance, Economics, Business Management

Bachelor of Technology in Computer Science

Sep 2013 – May 2017

JNTU Kakinada

Andhra Pradesh, India

- Computer Science, Java, Data Structures, DBMS, Software Engineering

Achievements and Certifications

Promotions

Promoted from Associate Trainee to Associate Consultant within 1 year

Certifications

CMMI Certified within 2 years. Ranked top 3 in Java Certification course

Languages

Fluent in English; Swedish-friendly business communication context
